

THE NOVA RANGE

ECONOMIC | RELIABLE | RECYCLED

Our Nova range of refurbished vending machines offers you great value and peace of mind. The range includes hot drink, snack & combi, cold drink, water and food machines.

Each one has been through a rigorous testing process and our Nova 20-point audit ensures you can be confident in their quality and reliability. And even better, the Nova range can contribute to your company's green credentials.

QUALITY REFURBISHED MACHINES

TECHNICAL EXCELLENCE

If you select our Fully Managed Service, one of our team of over 150 fully qualified engineers will be there to install your machine and to provide an ongoing high level of technical service.

RELIABLE

At Selecta we understand that machine **reliability is crucial** to a successful vending solution.

Each machine is tested thoroughly, ensuring every aspect of it is fully functional. There is a stringent **20-point quality audit check**, which takes place just before machines are shipped, to make sure that it adheres to our strict quality standards.

ECONOMIC

Do you want a **hassle free, fully managed service** but are not sure if the finances will work? Using a refurbished machine from our Nova range could be the answer.

Alternatively, **do you want to buy or lease a vending machine but budgets are tight?** The Nova range could make this possible, giving you a high quality vending solution whilst also helping you **manage the bottom line**.

And did you know, we put LED lights in our cold drinks and snack machines? This could **save you up to £1800** in electricity over the life of the contract* vs machines with traditional fluorescent lights.

*Based on three machines, over a 5 year contract.

EXCLUSIVE TO SELECTA

To help drive sales, all our snack and cold drinks machines have been upgraded with a white interior and LED lights, making products stand out and catching consumers' attention.

RECYCLED

When we refurbish a machine we reuse 95% of parts by weight. This means that over a year **434 tons of parts are reused** rather than being scrapped. This is the equivalent weight of approximately 217 cars.

We have also installed LED lights on our Nova snack and cold drink machines. This **reduces energy consumption by 27%** vs the same machines with traditional fluorescent lights*.

*Based on the Marrakesh machine, run for 15 hours 30 minutes

Did you know that one person is responsible for refurbishing each machine from start to finish? A personal touch with a professional finish.
